

**Marta Pawłowska**  
**Poland**

My first field of study - Archive Science and Records Management - motivated me to undertake farther education and now I am a second year student of Computer Science at University of Economy in

Bydgoszcz. It helps me a lot with understanding the general concept of networking. During my university education I was combining my school tasks with working in the touristic area. Thanks to that I found myself a well-organized person with a strong ambition to learn more and take up new challenges. In my free time I do sports – I love swimming, cycling an roller skating. I am also addicted to reading books 😊
