

Nerijus from Lithuania.

My name is Nerijus and i am proud to say that i am from Lithuania. I am 21 years old, born in the capital - Vilnius. I love my country and its second religion - basketball. It is almost two years when i am a member of the student association. I started from head of the group and now i am working for all the university in the field of marketing. It is just the second year of studying so i think i will reach much more because of my activities and want to improve myself. I love to communicate, to get to know other cultures and simply other people. Hope i will get to know all of the students in this project.
