

Simon is a practicing Chartered Architect and Academic in the UK and Finland, concentrating on master planning and urban design together with architectural projects that all concentrate on environmental sustainability, Zero Carbon and Passivhaus design. He has been involved in and led projects for Schools, Offices, Homes and Education Facilities that have been classified as BREEAM Excellent or Outstanding, while also winning sustainability awards. He has an extensive knowledge of the environmental and sustainability issues, and how to apply them in projects, while maintaining a high quality architectural ambition. He gained a First Class (with Honours) at Degree Level, a Distinction at Diploma level, and has been nominated 3 times for the Royal Institute of British Architects (RIBA) President's Medal.

He is currently at Jyväskylä University of Applied Science (JAMK) lecturing in Facilities Management but more broadly, He is a lecturer in architecture and architectural technology, where zero carbon and sustainable design are a priority. Having lectured in England, Germany and Finland, Simon has spent the last 15 years of his pedagogical background being devoted to developing professionally accredited courses which combine sustainable design, architecture/art and peer-led education.
